

Practical Exam

Personal Portfolio Website

Problem:

Create a responsive **Personal Portfolio Website** for a fictional student, developer, designer, or IT professional.

Your website must contain the following:

1. Home Section

Create a Home section that includes:

- A short introduction about the person.
- A profile image.
- A brief description of their skills or interests.
- A **live date and time** displayed using JavaScript.
- An embedded **local video** introducing the person or showcasing their work.

2. Gallery Section

Create a Gallery section containing **at least three images** representing:

- Projects
- Activities
- Skills
- Hobbies
- Achievements

Use Bootstrap's grid system to arrange the images responsively.

3. Contact Section

Create a Contact section containing a form with:

- Full Name
- Email Address
- Subject
- Message

- Submit button

Implement **JavaScript form validation**. The form should prevent submission when required fields are empty or when the email format is invalid.

4. Navigation

Create a Bootstrap navigation bar with exactly these three menu items:

- **Home**
- **Gallery**
- **Contact**

Each menu item must navigate to its corresponding section using HTML section IDs.

5. Technical Requirements

- Use **HTML**
- Use **JavaScript**
- Use **Bootstrap**
- Use Bootstrap's responsive classes and components.
- **Do not create or use a custom style.css file.**
- Integrate local images and a local video.
- The website must work properly on mobile devices.

6. Running the Website:

- Save your files in the designated folder.
- Copy the folder into your XAMPP htdocs directory.
- Run Apache in XAMPP and open your website in the browser at:
- `http://localhost/midtermpracA_YourLastName`

7. Submission:

- Ensure your code runs properly from the XAMPP server.

8. Scoring Deduction:

- Failure to follow file naming convention: –5 points.
- Failure to integrate multimedia: –10 points.

- Using a custom style.css file: –10 points.
- Failure to run properly under XAMPP: –10 points.
