

Practical Exam

Local Tourism Promotion Website

Problem:

Create a responsive **Tourism Promotion Website** for a fictional tourist destination in the Philippines.

Your website must contain the following:

1. Home Section

Create a Home section that includes:

- Name of the tourist destination.
- A short description of the place.
- A main destination image.
- A **live date and time** displayed using JavaScript.
- An embedded **local video** showing the destination, attraction, or tourism activity.

2. Gallery Section

Create a Gallery section containing **at least three images** showcasing different attractions or activities, such as:

- Beaches
- Mountains
- Waterfalls
- Historical sites
- Local food
- Festivals

Use Bootstrap's grid system to arrange the images responsively.

3. Contact Section

Create a Contact section containing a **Tourist Inquiry Form** with:

- Visitor Name
- Email Address
- Preferred Visit Date

- Number of Visitors
- Message/Inquiry
- Submit button

Implement **JavaScript form validation**. The form should prevent submission when required fields are empty and should validate the email address.

4. Navigation

Create a Bootstrap navigation bar with exactly these three menu items:

- **Home**
- **Gallery**
- **Contact**

The menu items must navigate to the appropriate sections using HTML IDs.

5. Technical Requirements

- Use **HTML**
- Use **JavaScript**
- Use **Bootstrap**
- Use Bootstrap's grid and responsive components.
- **No custom style.css file is allowed.**
- Integrate local images and a local video.
- The website must be responsive.

6. Running the Website:

- Save your files in the designated folder.
- Copy the folder into your XAMPP htdocs directory.
- Run Apache in XAMPP and open your website in the browser at:
- `http://localhost/midtermpracB_YourLastName`

7. Submission:

- Ensure your code runs properly from the XAMPP server.

8. Scoring Deduction:

- Failure to follow file naming convention: -5 points.

- Failure to integrate multimedia: -10 points.
- Using a custom style.css file: -10 points.
- Failure to run properly under XAMPP: -10 points.
